

About Us

OctoPipe: Your Specialist in Paste Pipe Reticulation Supply

OctoPipe is a dedicated supplier of paste pipe reticulation solutions. We provide direct shipping to mine sites from the OEM, along with strategically located storage facilities throughout Africa.

Our Product Offerings

- **A106B Schedule 80 Pipe**
- **Steel Wire Reinforced Composite Pipe (SRCP)**

All of our pipes come equipped with machined grooves for seamless compatibility with Shurjoint and Victaulic high-pressure couplings.

Paste Pipe Solutions

SRCP Paste Pipe

Compatible with:

- Shurjoint EH70- EP
- Victaulic HP-70-ES

Burst Pressure Results

dn200-7.0MPa Winding pipe static hydraulic test report

Report number: 20250724-001

Sample information				
Sample size	dn200×en15.0-7.0MPa			
Time of submission	2025-07-24（17:00）			
Sample batch number	PL2507125			
operative norm	CJ/T 537-2019			
Wall thickness of sample (mm)	17.4			
Outer diameter of sample (mm)	200.5			
condition of experiment				
Sealing joint type	Type A			
water temperature （℃）	20	test medium	Water to water	
Total length of sample (mm)	1170	active length (mm)	795	
experimental rig	KXGJ-30C-9 pipe static hydraulic test machine			
test result				
Test pressure (MPa)	Constant pressure time (h)	performance requirement	Type of destruction	Test results
14.0	1	No rupture, no leakage	/	Test passed
17.5	1	No rupture, no leakage	/	Test passed
18.0	1	No rupture, no leakage	/	Test passed

SHURJOINT TEST RESULTS

dn200-7.0MPa Hydraulic test report for clamping groove clamp joint

Report number: JYY-20251101-001

Sample Information				
Sample specifications		dn200-7.0MPa		
Sample source		Groove clamp joint for customers		
Sample time		2025-10-30		
Test implementation standard		CJ/T 537-2019		
condition of experiment				
Seal joint type		A mould		
water temperature （℃）		20	test medium	Water-Water
Sample length/Effective length (mm)		One section 755/270, another section 803/305		
experimental rig		KXGJ-30C-9 pipe static hydraulic testing machine		
test result				
Test pressure (MPa)	Constant pressure time (h)	performance requirement	Type of destruction	Test results
14.0	1	No rupture, no leakage	/	Test passed
Sample image				
				
Groove clamp image		Overall sample image		
conclusion	qualified .

SHURJOINT DESTRUCTIVE TEST RESULTS

Report number: BP-20251101-001

Sample Information			
Sample specifications	dn200-7.0MPa		
Sample source	Groove clamp joint for customers		
Sample time	2025-10-30		
Test implementation standard	CJ/T 537-2019		
condition of experiment			
Seal joint type	A mould		
water temperature （℃）	20	test medium	Water-Water
Sample length/Effective length (mm)	One section 755/270, another section 803/305		
experimental rig	KXGJ-30C-9 pipe static hydraulic testing machine		
test result			
Explosion pressure (MPa)	performance requirement	Destruction type	
19.45	blow up	The clamp is slightly damaged and the two snap-on connectors are separated	
Sample image			
			
Post-test image			
conclusion	The groove clamp joint provided by the customer showed minor damage when the pressure reached 19.45MPa.
